NOTES

Problem vs Issue

Word	Meaning	Example
Problem	A difficulty that needs to be solved. Usually more serious or has a clear negative impact.	<i>We have a problem with the website.</i>
Issue	A topic, concern, or a minor problem. Often sounds more neutral or professional.	<i>There is an issue with your account.</i>

Problem = something is definitely wrong and needs to be fixed. (проблема або складність)

Issue = can mean a problem, but also a matter for discussion or a concern. It's often used in business and customer service because it sounds less direct. (питання, аспект, проблема)
